Q3 [Reporting] Using Report Visualize Prompt, allow Outlet Managers to select chart type (Bar or Line) to view Hourly Order Volume Trends across different days of the week. Add prompts for Outlet Name and Order Type. Summarize peak hour, busiest day, and most popular category as text objects. Apply Conditional Styling to highlight hours with Cancelled orders > 10 in Amber. IBM Cognos Analytics - Real-Time Case Study Scenarios

Q4 [Exploration] Use Cognos Exploration to discover patterns in the SpicePot dataset. Explore the relationship between Order Type (Dine-In/Takeaway/Delivery) and Customer Rating. Investigate which Feedback Tags appear most frequently for Delivery orders and how they correlate with Delivery Time. Identify the top 5 best-performing menu items across all outlets and document findings.
